

HLAINE NADI KHANT

Ultimo, NSW | crystalhnk@gmail.com | 0432553561

SUMMARY

Third-year Computer Science (Honours) student at UTS with a WAM of 82.12, majoring in Enterprise System Development and minoring in Interaction Design. Experienced in building full-stack web and iOS applications across Java, C#, and Swift. Passionate about solving real problems through well-designed, user-centred software.

TECHNICAL SKILLS

- Languages: Java, C#, JavaScript, Swift, HTML/CSS, SQL, Python
- Frameworks & Libraries: React, SwiftUI, JSP, Windows Forms, Tailwind CSS, Entity Framework
- Databases & Storage: MySQL, SQLite, Firebase Firestore, JDBC, UserDefaults
- Tools & Platforms: Git, GitHub, Azure DevOps, Firebase, Xcode, LINQ
- Design: Figma, Miro, Adobe Suite, Canva
- Methodologies: Agile, MVC, MVVM

PROJECTS

Meal Prep iOS App

May 2026

- Collaborated in a team of three to build a full-featured iOS meal prep app using SwiftUI and MVVM architecture
- Owned and developed the Home, Trending, Recipe Detail, and Recipe Sharing screens
- Implemented guest and authenticated user flows, recipe browsing by cuisine and ingredient, and social sharing via link
- Built on-device data persistence for owned screens using UserDefaults, ensuring a fully offline experience with no backend dependency

GitHub: <https://github.com/EnrI001/MealPrep.git>

Tech: Swift, SwiftUI, MVVM, UserDefaults, Xcode

Shift Management System

Aug 2024 - Oct 2024

- Collaborated in a team of 2 to develop a desktop application with role-based access for Admins, Managers, and Employees to manage shifts, teams, and leave requests.
- Designed and built the entire front-end interface using Windows Presentation Forms, focusing on usability and clean navigation
- Developed dynamic UI components, including shift calendars, team management panels, and leave request forms

Tech: C#, Windows Forms, SQLite, LINQ, Entity Framework

IoTBay Web Application

March 2025 - May 2025

- Collaborated in a team of 6 to develop a web-based IoT e-commerce system using the MVC architecture and Agile methodology
- Implemented a full-stack admin portal for managing staff and customer accounts, handling both the UI and backend logic
- Built secure input validation, session handling, and role-based access control to protect system access

Tech: Java, JSP, JDBC, MySQL, MVC, HTML/CSS

JobSphere - Job Board Platform

October 2025

- Collaborated in a team of 5 to build a full-stack job board web application connecting job seekers with employers, using React and Firebase
- Owned and developed the Job Search feature with advanced filtering by location, category, salary, and job type, and keyword search functionality
- Built the Saved Jobs feature, allowing users to bookmark and manage job listings for later review
- Developed using Agile methodology with CI/CD pipeline managed via Azure DevOps

GitHub: <https://github.com/Jerry20030925/ASD-Jobs-Board.git>

Tech: React, JavaScript, Firebase Firestore, Firebase Auth, Tailwind CSS, Azure DevOps

EDUCATION

Bachelor of Computing Science (Honours)

Feb 2023 - Present

- University of Technology Sydney (UTS)
- WAM: 82.12
- Current Year: 4 | Expected Graduation: 2026
